
DESERT EAGLE PISTOLS

.357/.41/.44 Magnum

Semi-Automatic/Gas Operated

GENERAL FEATURES

- The DESERT EAGLE .357, .41 and .44 magnum semi-automatic pistol is gas-operated with a rotating bolt for positive lock-up.
- The barrel is locked in place, assuring a high degree of accuracy. Maximum effective range with the standard 6 inch barrel is 200 meters (650 ft.)
- The polygonal rifling reduces barrel wear and enhances the obturation between the bullet and the bore, thus increasing accuracy.
- Anatomically formed grip, ideal hand seating angle and comfortable grip dimensions permit rapid, accurate instinctive shooting. The combat-type trigger guard is designed for two-handed shooting.
- In addition to its high accuracy and low recoil, the DESERT EAGLE offers the convenience of firing standard rimmed .357, .41 or .44 Magnum revolver ammunition, available everywhere. Semi-jacketed and gas-checked rounds may be fired.
- When the last round in the magazine is fired, the slide remains in its maximum recoil position, permitting rapid change of magazine and immediate chambering of a round for instant resumption of firing.

← Cover Photo includes from bottom to top:
1. Standard .44
2. .357 Magnum Satin Nickel with Gold Appointments.
3. Stainless Steel Model with stainless frame, black oxide barrel and slide.
4. 14" Barrel with Bright Nickel Finish.
5. 14" Barrel on Alloy Frame with Satin Nickel Slide with DEP 350 Scope Mount and InterAims Mark V Sight.

← The DESERT EAGLE gives you the convenience of firing three of the most widely available rounds — standard rimmed .357, .41 and .44 Magnum cartridges — usually revolver ammunition — now in your semi-auto in either semi-jacketed or gas-checked rounds.

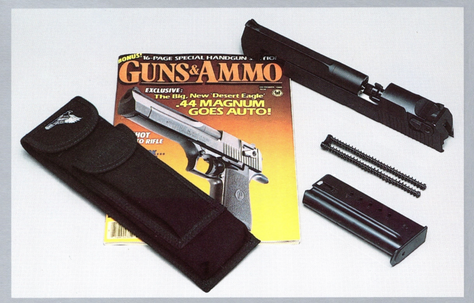
SAFETY

The safety catch is operable by right and left handed shooters. When in SAFE position it provides double safety against accidental firing by immobilizing the firing pin and disconnecting the trigger bar fron the sear at the same time. Extensive tests in accordance with military specifications include drop tests that show the DESERT EAGLE is safe from accidental firing, even when dropped on the hammer.

CONSTRUCTION MATERIALS

The parts are machined or precision-cast and machined from high quality steels to strict military standards, with the traditional attention to safety and durability of Israel Military Industries.

The DESERT EAGLE lightweight is also available with an aluminum alloy frame for reduced weight.



CONVERSION KITS

Convert your pistol to a second or third caliber. Standard frame accepts .357, .41 and .44 Magnum components.

.41 and .44 Conversion Kits include: slide, bolt, barrel, recoil springs, magazine, and carrying case (from .357 Magnum).

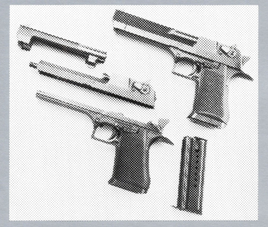
You will be able to convert a .357 to .44/.41 Magnum with the above Kit. The .44/.41 Magnum to .357 Kit will include: six inch barrel, slide, bolt, recoil springs and a magazine and carrying case. The .41/.44 Magnum conversions do not require second slide.

Patent No. 4,563,937
Magnum Research, Inc.

ACCESSORIES

BARRELS

The DESERT EAGLE pistol is supplied with a standard 6 inch barrel. 10 and 14 inch barrels are also available and can be interchanged without tools in a few seconds (.357 - 6 & 14 inch only).



Field strips in less than 10 seconds without tools.

.44 MAGNUM Shown Actual Size

CUSTOM FINISHES

Your DESERT EAGLE Pistol is available with a choice of custom finishes. In addition to the Standard Black Oxide Finish you can choose from Satin Nickel, Bright Nickel or Polished and Blued, Matte Hard Chrome, Polished Hard Chrome, and Brushed Hard Chrome. The Alloy Frame pistol is available with a Satin Nickel Slide.

These variations are all stock items. Combinations of these finishes or gold finished appointments are available by special order.

14" Barrels with Custom Shop Finishes bottom to top: Standard Black Oxide, Bright Nickel, Satin Nickel, Polished and Blued.

Custom Shop Finishes bottom to top: Polished and Blued, Satin Nickel and Bright Nickel.

Special Order 6" Barrel — Polished and blued with Bright Gold Appointments.

Matte chrome pistol with stainless steel finish scope mount and scope.

Stainless Steel Frame.

SIGHTS

The DESERT EAGLE pistol is equipped with standard combat sights. In addition, the following sights may be used:

- fully adjustable rear sight with target-type front sight white or orange (P/N DEP 300)
- telescopic sight, mounted on the scope mount (P/N DEP 350)
- your choice of telescopic sight or other sighting devices.

COMPARE THE DESERT EAGLE TO ANY OTHER HANDGUN!

Magnum stopping-power is finally unleashed in a semi-automatic. The DESERT EAGLE's gas operation provides light recoil, quick recovery and the fastest possible second shot in semi-auto. A magnum caliber pistol that is easy to control and to keep on target under rapid fire.

Controlled Rapid Fire - extremely low recoil and muzzle jump for Magnum Calibers.

FIREPOWER

10 Shots .357 Magnum/ 9 Shots .44/.41 Magnum. Beats any 6 gun — delivers more firepower than other handguns.

ACCURACY

The polygonal barrel is cold-swaged, hammer forged steel — the barrel does not recoil and is rigidly held fore and aft. Long 8.5" sighting radius with 6" barrels. Increased muzzle velocity because bolt is fully locked up. Effective accuracy to 200 meters with 6" barrel (300 meters - 14" barrel).

LOW RECOIL

The blast and muzzle flash of the DESERT EAGLE is violently awesome — everything comes out of the front of the barrel. Yet because of the gas operation and the location of the gas piston, the action of the pistol more than compensates for the increased front end pressures and gives the shooter both less muzzle flip and less felt recoil. If you want to shoot a Magnum caliber all day — this is your pistol. You'll shoot more relaxed and your groups will show it.

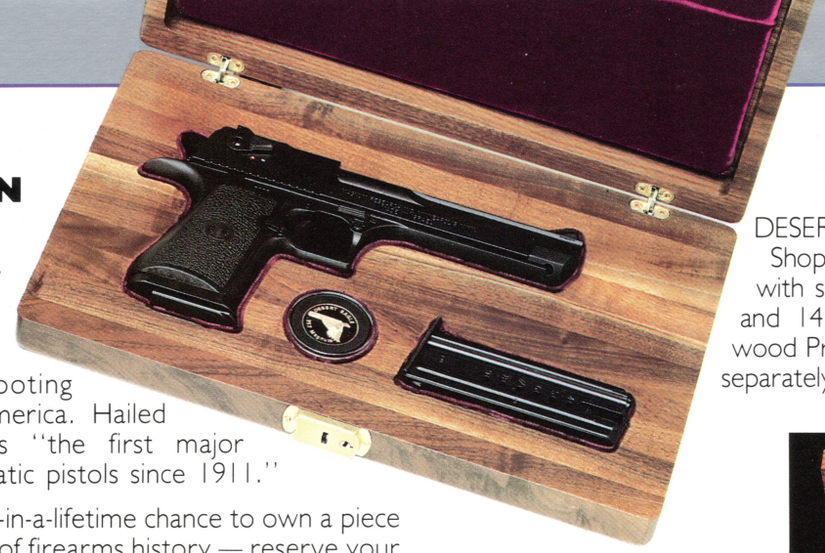
SECOND SHOT

There is no Magnum pistol or revolver with a quicker second shot than the DESERT EAGLE. The gas operation and weight balance make it a "natural pointer". The DESERT EAGLE rock and rolls, but it stays on target.

RAPID FIRE

The DESERT EAGLE is most awesome with rapid fire — you won't find a quicker way to unload this much firepower.

COLLECTOR'S EDITION PRESENTATION SERIES



A new legend is born. **The DESERT EAGLE .357 Magnum Pistols** have been written up by every major shooting sports magazine in America. Hailed by Guns Magazine as "the first major advance in semi-automatic pistols since 1911."
